How does the Windows Defender SmartScreen work?

Microsoft Defender SmartScreen is a feature of Windows, Internet Explorer, and Microsoft Edge. It is designed to help protect you from fraudulent that try to steal your personal information. Also, SmartScreen in Internet Explorer 8 and later helps protect you from downloading malicious software.

In short, Microsoft windows defender SmartScreen protects against phishing or malware websites and applications, and the downloading of potentially malicious files.

Microsoft Defender SmartScreen notice an early warning system against phishing websites attacks or attempt to distribute malware through a socially engineered attack. It will be scanning any files an app (including 3rd-party browsers and email clients) attempts to download and run.

Therefore, SmartScreen blocks URLs associated with potentially unwanted applications, or PUAs

4 STEPS TO BYPASS WINDOWS DEFENDER SMARTSCREEN

Ultimate Tips 2022

1. First, buy a trusted host.
2. Then, make a landing page with inbound linking.
3. Finally, link some texts to different external legitimate links.

Use A Trusted Host with Legitimate Traffic

- Rule #1:** Set privacy policy for host and website. It will help to bypass SmartScreen AI in first scanning.
- Rule #2:** Buy a legitimate SSL. The paid SSL make your host reliable too VS free SSL host.
- Rule #3:** Finally redirect your domain from HTTP to HTTPS.

The 3 points to do before using SSL Hosting Structure

- Tip #1:** First make a list from public software with Code Signing Certified
- Tip #2: Download FUD crypter 2022** and Clone Certificate. Remember Top RAT trojan 2022 make your file FUD for longer time.
- Tip #3:** Use each Certified file for a submission
- Tip #4:** Eventually, upload official certified files to trusted hosts.

Clone App Certificate

SmartScreen prevent cross-domain attacks and persistence.

Remove Process Persistence

Do you actively use Windows Defender?

Yes

No

Not sure

Summary

Even if you're a self-proclaimed terrible hacker who spends weeks Windows security and Windows Defender, you can bypass SmartScreen and Windows Defender firewall without consuming days of your time.

This is not to say your try will take 60 minutes — it probably won't. However, over time this process will become second nature and you'll find you can bypass Windows Defender SmartScreen in less than an hour.

We're proof it doesn't require any form of wizardry or extraordinary talent. What it takes is commitment and trust in the systems proven to generate results.

There will be moments when the process gets grueling, but when your file knows as a reputable source, you'll know it was worth the effort.
